

EquipmentCloud®

Use Case: Customer Platform

The **EquipmentCloud®** is a digital transformation solution for mechanical engineering. With its various user-friendly modules, it forms the basis for your proactive service and after-sales along the entire machine life cycle.

- Increase customer satisfaction
- Digitize maintenance
- Monitor machine performance

Service and Support with the Smartphone

- Your digital tool box
- Your data always at hand
- Your direct channel to the customer

Your benefits:

Immediately ready to inspire your customers

Create valid information

Gain time

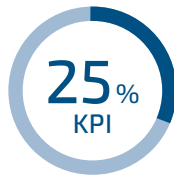

Provide proactive service

Create new potential

Faster customer support

Higher spare parts turnover
